

WHICH MATERIAL TRANSFERS THE OPTIMAL IMPULSE?

As to be expected, it required a lengthy search and testing of materials, in order to find those whose frequency and pristine state provided us with the optimal foundation required, in order to produce our AQUADEA vortex chambers, for the swirling of tap water, as well as for the shower heads! **The result of this search is the bronze bell clapper.**

It is pure and without any lead. It has the ability to transfer the finest sound waves and high frequencies, so tells us why it was originally used for bell construction! On top of this **a layer of precious metals** are placed and these correspond to the "root chord". In addition a variety of **pure crystals, precious stones, semi-precious stones and quartz crystals** are augmented in order to offer a variety of "overtones".

The root tones of the AQUADEA vortex cells are:

Gold, silver, palladium, rhodium, ruthenium, platinum and titanium with their own homeopathic properties.

THE CRYSTAL TONES

The overtones of the AQUADEA crystal vortex cells:

Quartz, rose quartz, aquamarine, diamond, sapphire, ruby, tourmaline, shungite ...

These days you can find a wide assortment of literature on precious stones and their effects, so here, we only present you with a minimal overview of the impact some of the crystals in our **AQUADEA** vortex cells have:

Rock Crystal

This stone clears and heals, improving one's ability to perceive inwardly as well as outwardly. It strengthens the individual's personality and bestows more energy. It also strengthens the effects of other stones.

Rose Quartz

In a very gentle manner this stone assists you in achieving self-love. It supports one in the heart chakra, as well as helping you to open up to those in your environment and assists you in recognizing one's true needs.

Diamond

The quality of the diamond's frequency depends upon whether it has been cut or it is raw. Raw diamonds are powerful and earthy.

Cut diamonds on the other hand, bring an enormous amount of structure and an intense density of energy, which can be quite demanding at times.

Aquamarine

It makes water soft and carries a tone of truth and perseverance. It supports clear communication and can help to open up your horizon.

It is our recommendation for you to listen to your own intuition in discovering which crystal vortex cell is the optimal one for you! **If, however, you would like some consultation on this matter, it would be our pleasure!**

WOULD YOU LIKE TO DRINK CRYSTAL WATER OR PREFER TO BATH IN GOLD?

Here is an overview of our products.

THE AQUADEA LIFEPOWER VORTEX SHOWER HEADS

The AQUADEA Shower heads are equipped with five or seven **cells in a sequential alignment**.

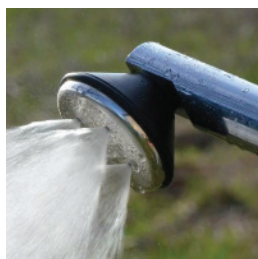

They can be ordered with or without the overtones from the crystal stones. However, in combination with the respective materials (root tone) and the selection of the desired crystal (overtone), very different qualities and tones can be manifested.

Pict. antique handle & Standard handle

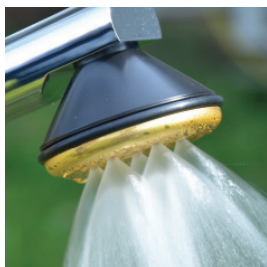

The "Gentleness"

The AQUADEA Vortex Shower Head **with five cells** – gently envelops you, subtly, like a gentle country rain! It ionizes and impacts the air with a uniformed distribution.

The "Intensity"

The AQUADEA Vortex Shower Head **with seven cells** – encompasses you and is powerful like a waterfall. Due to the arrangement of the two additional cells, a stronger stream of water arises in the middle, producing a subtle massaging effect. This shower head definitely carries its tone powerfully into the water and into the room.

Both of the shower heads achieve a harmonious feeling on the skin and very frequently following these showers no skin lotion is required.

With the purchase of each shower head you will also receive a special clip, which allows you to fixate the shower head on the floor of your bathtub. This enables you to easily enjoy a wonderful bath in this vitalized water.

The "root tone" from the metal is particularly intensive in our Aquadea LifeSource showers, so we gave them names:

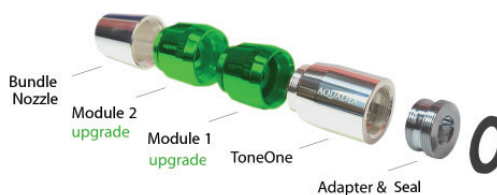

gold: Sun	silver: Inspiration
palladium: Inner Child	rhodium: Knowledge
ruthenium: Success	platinum: Integrity

THE AQUADEA LIFESOURCE TAP WATER VORTEX

Unfortunately for most of us, it's almost impossible, nowadays, to get good fresh mountain water to drink. As far as "filtered water" is concerned, we are not going to presently deal with this subject in this text, even though it is becoming increasingly important for more and more people. Our product makes a contribution in a very high quality to the ecological restoration of water.

One very significant feature of our AQUADEA tap water vortex and its module is that further modules can be installed **under** the base vortex of "Tone One".

Pict. Aquadea ToneOne Upgrade to Harmony 3

In this manner you can achieve a **multiple connectivity**, which you can personally select and change as you desire. In addition to that, the choice of crystal cells provides an individualized customization. (Please note: only part of the cell is composed of crystal)

Every person and every body has its own special order within their system, in other words, it has an especial amount of disorder or dysfunction within its system. When I give this body a certain quality of water, which has a higher structure of order, this will result in bodily reactions. Those areas which have a disorder will "fight" more or less to remain the way they are. The greater the difference between order (function) and disorder (dysfunction and compromises) the more will get into motion. The greater the adjustment becomes, the more it is opened experienced as an initial worsening. Partially due to the momentum arising in the high potentiated areas, backgrounds are contacted which normally might require therapeutical assistance.

The **different requirements** each individual has, should be initially considered. In this context and in order to give the body initial support, whilst integrating bodily - reactions which are trying to find their new order, it makes sense in the beginning to equip the AQUADEA Tap Water with the Vortex: AQUADEA „ToneOne“ or the vortex trio „Harmony 3“ for drinking purposes. After an adjustment phase for the body, from between two to three months, in which it acclimates itself to the higher order of structure, new Modules can be added to the vortex system.

MULTIPLE MODULAR ADJUSTMENTS

A SUCCESSFUL INSTRUMENT FOR YOUR INDIVIDUAL WATER CONFIGURATION!

The more vortex cells are interconnectively sequenced, one upon another, the more vitality and drive is impacted upon the water, in the form of micro and nano vortices. As each gradient of swirl capacity is accelerated, higher and higher frequencies are achieved. These enter into a resonance with the physical body and cellular level to the Zero point, where there is no frequency, just BEINGNESS. The degree of and especially the intensity of such high frequencies, which impact the mental and spiritual levels, increase when there is a minimum of six as a modular adjustment.

With each advancing level a higher dispersion of the clusters is achieved, thereby changing the physicality of the water. The crystal of the lowest module has the strongest transference of the Overtone.

An individual consultation can assist you in discovering your individual tone. This will help you to achieve a harmonisation and consonance in your system!

AQUADEA TONEONE

The AQUADEA basic unit is ToneOne. This water is of a quality which is especially suitable for those starting out. This is then of utmost importance, when those starting out have not as yet begun to nourish themselves consciously and suitably, according to their health needs. With this water, their system has the chance to easily adjust to the new water quality.

AQUADEA HARMONY 3

This trio-configuration is in its entirety very harmonious. The water has a harmonizing, strengthening, detoxifying and stabilizing effect. This modular configuration is especially geared for those who have healthy nourishment patterns.

AQUADEA HARMONY 5

Five modules configured sequentially, one after the other, bestow the water with a tone of meaning and sensuality. This potency of 5 supports our senses and perception; stimulates creative thought and helps the body to integrate the 5 elements into its system.

AQUADEA HARMONY 6

Configurations with even numbers, such as two and four, have not proven to be very harmonious.

The configuration, however, with 6 proves to be very balancing. It increases the harmony between body and soul, as well as supporting us, in accepting the material aspects of life. A feeling of freedom can arise.

AQUADEA HARMONY 7

The seventh direction would be one which goes within! This is precisely the theme of water when it has the configuration of 7. It helps us to go within, to recognize our internal light as well as the needs and desires of our soul. Body and soul meet here together at a higher level. This supports us in our ability to experience the closeness of another human.

“The manner in which we connect up to the world, determines how the world in turn connects with us!”

The configuration with 21 repeats this basic pattern, but on an exponentiated level.

AQUADEA HARMONY 8

If you let water run for a while through HARMONY 8 and you let the arising field affect you, you will begin to enter a surreal level. Here you can experience the feeling of **“nothing ends and nothing begins”**, a kind of feeling of eternity. With HARMONY 7 things were still exact and understandable, but on the level with 8 they lose substance. This water requires you to open up and engage in it, whilst simultaneously not losing a sense of self and not having previously consumed water with a “configuration 7”, as in HARMONY 7.

Some people will experience the configuration 8 water as abundance and rejuvenation, or as a calm core within the everyday movement of life.

Here an equilibrium begins to become apparent.

Pict. Aquadea Harmony 5 without bundle nozzle

AQUADEA HARMONY 9

The field which arises, when water of this configuration is left running, proves to be one with a great deal of structure. This, in turn, affects in us the need for structure, e.g. in cleaning up, straightening up or sorting out. These are the kinds of activities which you realise are now much easier to do. Things which have been left undone can suddenly be completed more quickly. New things can be started with much more precision.

This water also helps the individual to achieve more inward structure and clarity.

The nine is the potentiation of the three.

The above-mentioned as well as **many more connective configurations** can be implemented, according to **your requests and desires**. Via this variability, we do indeed touch upon a highly potent, homeopathic area which may reveal topics requiring therapeutic support. Consequently, we do like to offer consultation on which potentiation of water would be the best for you, or your clients or your customers!

If and when required, we would also be happy to recommend to you, alternative practitioners and health consultants who work with AQUADEA Water.

Are you personally interested in working with water? We also offer lectures and further education in this area!

OUR NEW AQUADEA CENTURY CRYSTAL GATEWAY

This extraordinary shower-portal consists of 27 crystal vortex cells which have been brought into the form of the Flower of Life! The extremely strong intensity of the many AQUADEA cells, the precious metal and the rock crystal are awesome!

The water bubbles softly forth and gently bathes the skin. It feels fantastically gentle and playful and the arising energy field invites you to invigorate yourself!

It's not only fun to shower beneath it, but it also lends itself as a spouting fountain or waterfall to be enjoyed continuously, e.g. in parks, gardens, hotels or Spas. This water gateway exudes a strong attraction and fascination and creates a center of energy! You just feel good being in its vicinity!

OUR SHARED VISION OF A HEALTHY COOPERATION!

We have made it our mission to learn about and from water and to teach it! Let us join together and make a communal effort to save our water, so that it will be here in a healthy condition for future generations and be available to all.

So, now you have learned much about the effects of the AQUADEA vortex cells and the energy fields which they create. We have recognized this potential and it is our Vision **to use this for the benefit of everyone.**

Join in with us and connect up with the life affirming energy field of AQUADEA water!

The more vortex cells create their energy fields around the world and connect up with each other, the more healing order and space will arise. This is why – once a week – you should let your AQUADEA vortex cells be active for an hour or more!

When all of us, who have the AQUADEA vortex cells as shower heads, or in the form of a tap water module or as a gateway, **let the water run as described every Friday during the time of 15 h to 19 h**, a superordinated, connective energy field will arise. This global field can then become an impulse for a natural and higher structure of order. Here nature itself can connect up and receive an impulse to regenerate.

Please do not be hesitant and worried about “wasting your water” this way! Your flowers will be very happy to receive such water and the cleansing processes of waste water, as well as the work of purification installations, will be accelerated through and benefit from this.

In the spirit of unity, we hope to have afforded you a small insight into our technology and philosophy.

Please enjoy your new water experience!
